
Popular Configurations

Soft Dunlop
Medium Dunlop
Firm Dunlop

This combo offers pressure-relieving softness with stable support for the spine. Comfortable for many body types, it's also a popular choice for guest beds and an adaptable configuration for a growing child. The top two layers can be reversed for a firmer feel.

Soft Dunlop	Med. Dunlop
Soft Dunlop	Firm Dunlop
Med. Dunlop	Firm Dunlop

Left: Soft layering offers petite people a cradling feel with little “resistance.” **Right:** Those with nerve-related back pain (especially disk issues) often need very firm support; Dunlop does this best. An alternative with a bit more yield is Medium over Medium over Firm.

Soft Talalay	
Soft Dunlop	Med. Dunlop
Med. Dunlop	Firm Dunlop

Many couples love luxurious Soft Talalay. **Left:** For someone who loves climbing “into” bed, this top transitions gently to Soft Dunlop. **Right:** With denser core layers, a larger person or someone with frequent muscle-related backache can benefit from both types.

Soft Talalay	
Soft Talalay	Med. Talalay
Firm Dunlop	

Talayay layers can ease shoulder or hip stiffness and help relieve other chronic pain. **Left:** Great for petite-to-average people who love “a bed that hugs back” -- but folks over 160 pounds need more density. **Right:** Stable core support topped with just enough pressure relief.

Savvy Woolsy topper	
Medium Talalay	
Medium Dunlop	
Firm Dunlop	

For people who sleep hot or those who prefer just a hint of “pillowy,” the Savvy Woolsy is a uniquely comforting surface. Here, luxurious Medium Talalay is responsive but not too “sinky.” Heavy people appreciate how well it transitions their weight to the denser Dunlop below.

Harmony topper	
Soft Talalay	
Medium Talalay	
Firm Dunlop	

The separate Harmony topper creates a blissful, embracing feel. Soft Talalay makes the plushest Harmony. A Soft Dunlop Harmony is comfortably soft, a bit firmer than the Talalay. A Harmony can top any configuration; here, Talalay is layered over a stable core.

Important Notes for Customers

about the Serenity, Unity Pillowtop or Tranquility mattresses (or Harmony topper)

We hope you'll enjoy many years of comfortable, restorative sleep on your new Savvy Rest mattress or topper. Because natural, plant-based materials look and behave differently than synthetic materials do, you may notice a few visual differences in our products. This guide offers a quick summary. Our web site, www.savvyrest.com, is also full of detailed information. The URLs below are good places to start. Other questions? Don't hesitate to ask the dealer from whom you purchased your Savvy Rest.

Latex Exchange

Remember, you have 90 days from the date you receive your Savvy Rest to be sure you're comfortable with its firmness or softness. If you decide after a few weeks that you'd like a layer to be softer or firmer than your original choice, just contact the dealer you purchased from to order a latex exchange. The new layer is shipped to you, and you return the exchanged layer in the same box the new piece arrived in. Shipping fees apply.

<http://www.savvyrest.com/policies/latex-exchange>

Cosmetics

A layer of natural latex may have one or more cosmetic imperfections or natural variations: voids and/or color irregularities are common; small lateral tears of up to three inches are possible. These will not affect the performance or longevity of your mattress. Natural latex may become markedly more yellow with time, and the surfaces can develop a thin, dry outer membrane. These changes result from the natural oxidation of plant material, and will not alter mattress comfort.

<http://www.savvyrest.com/whysavvy-rest/variations-in-natural-latex>

Scent

Natural latex is made from rubber tree serum. It is natural rubber, but it is still rubber. Most people do not, but some can detect the scent of the rubber plant. If you notice this, airing out the layers prior to assembly in a space with good air flow is advisable. The scent's strength can vary from batch to batch and take 2 to 4 weeks to dissipate fully.

Dunlop Latex

Firmness

The firmness of a Dunlop layer will vary somewhat from batch to batch. No two Firm, Medium or Soft layers will feel exactly the same, so the mattress you receive may not feel *exactly* like the one you tried in a store. Street clothes, muscle tension from shopping and other factors can also contribute to it feeling a bit different at home.

<http://www.savvyrest.com/blog/guide-to-firmness>

Talalay Latex

Seams

Natural Talalay layers are made in 40" molds. Any layer wider than a Twin is seamed head-to-foot (off center) with a water-based bond.

<http://www.savvyrest.com/why-savvy-rest/natural-dunlop-talalay>

Firmness

Natural Talalay firmness also varies from batch to batch. Suppliers do not provide official ILD (Indentation Load Deflection) measures.

Foundations

Height

To ensure fit, be certain to measure your bed frame or bedstead before choosing the 9" or 5" height.

<http://www.savvyrest.com/products/foundations/savvy-rest-foundation>

Splits

Split Queens are available (all King and California King foundations are two-piece, or split).

NOTE: No foundation exchanges are permitted once a foundation has shipped.

Casings

IMPORTANT -- DO NOT WASH! Wool batting shrinks. Use a mattress pad to protect your mattress. The zippered design eases assembly and customization; though removable, the casing is not washable.

NOTE: Savvy Rest mattresses are NOT chemically treated or warranted against the growth of mold and are NOT recommended for use directly on a floor, which increases the risk of mold growth.
